We take pleasure in enclosing our descriptive circular and price list covering the Pacific Strain Delphinium Plants we are offering this year.

These plants are all grown from originator's seed, are established in pots, and are practically sure to give you 100% stand. With proper care every plant will grow. Would stress the importance of early planting: first bloom will be in July or August.

Last year we made displays at the New York Worlds Fair, "Gardens on Parade" on two different occasions, being awarded a silver medal certificate each time. Our first display was of Pacific Strain mixed blue hybrids. Our second was of the Galahad Series, Vetterle and Reinelt's beautiful white.

Plants are available of both these and many other varieties this year. Thanking you for your consideration of this offering, we are,

Yours truly,
